button when the display-image discrimination means discriminates that the image data is to be displayed panoramically.

5. An image reproduction apparatus according to claim 4, wherein the display-mode setting means includes means for, when the frame-advance button is operated again after the scroll operation of the panoramic image is completed, starting a scroll operation of a subsequent panoramic image automatically.

6. An image reproduction apparatus according to claim 1, wherein the display means includes means for switching a scroll display mode for scrolling a panoramic image and a frame-advance display mode for advancing images frame by frame.

7. An image reproduction apparatus according to claim 1, wherein the display means includes means for switching an entire reduced-image display mode in which a panoramic image is reduced as it is and the reduced panoramic image is displayed at once within a display area and a scroll display mode in which a panoramic image of a normal size is scrolled and displayed.

8. An image reproduction apparatus according to claim 1, wherein the display means includes means for clearly displaying whether an image displayed in a display area is part or all of the image data.

9. An image reproduction apparatus according to claim 1, wherein the display means includes means for
